## **DETAILED ACTION**

### ***Specification***

1. The title of the invention is not descriptive because it is too generic to be meaningful. A new title is required that is clearly indicative of the invention to which the claims are directed.

### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Art Unit: 2841

3. Claims 13-15, 20-22, and 25 are rejected under 35 U.S.C. 102(b) as being anticipated by Konishi et al (U.S. 5,753,867). Konishi et al discloses the claimed invention including the substantially uninterrupted shield (23) which extends upward and downward underneath the transporters (Col. 6, lines 35-47).

4. Claims 13-15, 20-22, and 25 are rejected under 35 U.S.C. 102(e) as being anticipated by Miyamoto et al (U.S. 6,188,029 B1). Miyamoto et al discloses the claimed invention including the substantially uninterrupted shield (B) which extends upward and downward underneath the transporters (Col. 5, lines 14-36).

***Claim Rejections - 35 USC § 103***

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 23 is rejected under 35 U.S.C. 103(a) as being unpatentable over Konishi et al (U.S. 5,753,867). Konishi et al does not expressly state that the CPU controller is located inside the screen face 23. However, this would have been an obvious place for it since this would place the controller in a central location between the hoppers which would reduce the amount of wiring required; also, it has been held that a mere relocation of parts, without more, would have been obvious to the ordinary practitioner..

### **Conclusion**

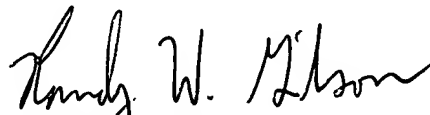

6. Claims 16-19 and 24 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
